# MARKET LEADER WORLDWIDE

The VK group includes sales companies in six countries who are specialized in debarking. In addition VK clients are served by a local dealer in nearly all wood processing countries. Manufacturing of VK debarkers has been centralized at Valon Kone's production plant in Lohja, Finland.

VK debarkers will debark logs from a few centimeters in diameter up to nearly two meters. Debarkable logs vary from rainforest giants to first thinnings. Valon Kone has a worldwide service network to guarantee a rapid service for all VK debarkers.

Spare parts can be obtained direct from Valon Kone's stock in Finland or from local dealers. Valon Kone's maintenance crew visit clients regularly and sometimes even without a specific order. This client oriented "customer care" philosophy guarantees VK debarkers operate continuously at optimum performance levels. Service is a significant part of our specialized know-how.

Valon Kone is the largest manufacturer of debarkers in the world. Valon Kone has produced debarkers for over 50 years and has accumulated technical knowledge from over 6000 machines.

Valon Kone is a technical pioneer in its field. It has spent 6 – 8 % of the annual turnover on R & D. As a result Valon Kone offers a very wide range of debarkers – over 30 machine types for all industrial tree species found in the world. VK debarkers are working in about 80 forest industry countries.
